

Technical Specifications

Maximum speed: 20 km/h [12,6 mph]

Acceleration: 0-20 km/h (0-12,6 mph) less than 2 seconds

Torque: 4 x 52,5 NM [210 NM]

Output: 4 x 1000 W [4 kW]

Batteries: 2 x 48V / 10Ah [LiFeP04 Battery Cells]

Maximum range
standard battery: Up to 40 km (25 miles)

Number of charging cycles: >800

Charging time: approx. 2-4 hours

Frame: steel

Weight: 108 kg (238 pounds)

Ground clearance: 17 cm (7 inches)

Track width,
center/center: 65 cm (26 inches)

Putting a smile on your face

Get beyond the sidewalk, through snow, sand or dense forest! Enjoy hiking, trailing, fishing, hunting or join your friends mountain-biking. Get outdoors in all kinds of weather and all kinds of terrain.

In a Zoom you'll feel the wind in your face and live a more active and healthier life!

[zoom]ability

The ultimate freedom machine

Zoom Uphill is a 4-wheel drive, electric vehicle with unmatched mobility and performance. You will get to enjoy places far beyond your previous reach without being dependent on others or clumsy and slow machines.

Sandy beaches, muddy roads or snowy hills, are no match for you when you are in a zoom. And still, compact and agile enough to suit your daily activities.

Exceptional terrain capability

The patented frame design ensures that all four wheels stay in contact with the ground regardless of the type of surface. This provides unmatched 4-wheel drive performance and takes you places you didn't believe were within your reach.

Fast & reliable

Your friends will no longer wait for you. You will have to wait for them. In the highest speed mode, you will definitely feel the wind in your face. You can go hiking, fishing, hunting or mountain biking. The reliable batteries will last 40km (25 miles), and that is a long hike.

Light & compact

You don't need a trailer, you can fit a Zoom in a station wagon like Toyota Corolla. You will be able to easily fit in narrow paths, alleys or supermarket doors.

Safe & comfortable

Your safety is our greatest focus. Zoom's extremely low center of gravity, keeps you safe and comfortable during long rides and adventures in any terrain.

I never imagined that I could experience nature to the fullest again... ” ”

Maud Einarsson

My love for the outdoors didn't fade away, even when I fell ill and faced severe mobility challenges. In fact, nature's rejuvenating power became even more crucial during this time. Few years ago, my life took a different turn when I had to accept a wheelchair in my life. Despite my illness, I remained determined to stay connected with nature. I refused to let it stop me from enjoying the outdoors...

It's so great to be able to join my brother wherever he goes... ” ”

Peters de Wilde

De Wilde brothers wanted to have equal opportunities to go everywhere and soon Jeroen discovered the Zoom all terrain wheelchair and it opened up new opportunities. Suddenly he could join on paths off road, he and Jeroen could cover greater distances and nature could be reclaimed.

You believe trekking is impossible if you are in a wheelchair? Go and try a ZOOM! ” ”

Patrick Mayer

Every time I explore nature with my Zoom, I am truly impressed by it's power and capabilities. The Zoom allows me to leave my handicap at home and just enjoy the untouched nature.

I can finally explore so many beautiful places... ” ”

Nellie Andersson

Previously I could not explore the world beyond the regular places. Now I can explore so much more together with my friends.
